Maximum recommended length for 0.32mm is 6m

- **Base material:** ZINCAL© coils made using world class patented metal coating technology
- **Paint systems:** Colour plus textured and optima
- **Finish:** Gloss or textured
- **Thickness:** 0.32mm, 0.4mm, 0.5mm, 0.6mm (+/-10%) Maximum 0.60mm (22g)

Material options

Aluminium-zinc Gauge (mm)

AZ85, AZ100-AZ150: 0.32 0.40 0.50 0.60

Versatile is rolled in soft material only-

Input coil width: 1220

Profiled sheet width (overall width): 1077

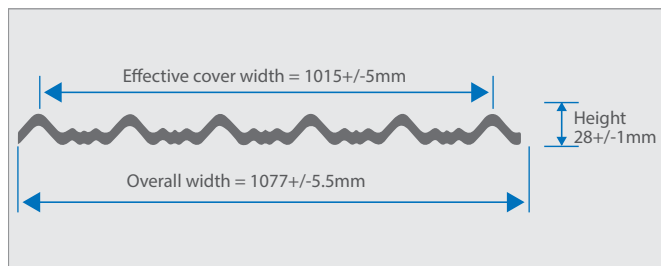

Rib to Rib width i.e. pitch: 203

Depth of each tile (Step To Step): 300

Effective cover width: 1015

Purling spacing

Battens / purlins should be spaced at 300mm on both ridge and eave (i.e.: at every tile step), and at maximum 600mm (i.e.: at every second tile step) 0 internal spans, although battens at every step will be stronger

Roof pitch

Versatile can be used on a roof pitched from as low as 15degrees

Note: During installation, clean the roof daily by removing all swarf, pop rivets and unused fasteners or any other debris

Features:

Features:

- Sheets
 - Continuous length profile increases visual uniformity
 - Reduces chance leakage
 - Lightweight safer to lift and install while enabling the supporting structure to be less bulky/costly
- No underlays needed
- Rapid roof coverage
 - Large panel size enables roofing to be completed faster
 - Easy and secure - roofing sheets are fixed to the roof structure
- World class patented coating technology
- MRM Mark of Quality - each sheet is inspected over 6 times before dispatch
- Engineered to prevent leakage by capillary action
